## Job Title: A LICENSED AIRCRAFT ENGINEER

### Role Purpose (position scope)

The position is to assist the Crew Chief in being responsible to the Chief Engineer, for the safety, regulatory compliance and operational performance of all Part-145/A8-23 aircraft maintenance activities within the Aircraft Maintenance department and detached locations, essential to the effective delivery of customer contractual requirements.

### SPECIAL CONDITIONS

Aircraft Maintenance is highly regulated with safety, quality and regulatory compliance being held as the first priority. The A licensed Engineer must drive and deliver a culture of safety first ahead of schedule, with the highest level of safety and regulatory compliance across all relevant areas. Promoting SHE and Security in relation to the performance of fleet maintenance activities is essential.

Operational activities are based around customer requirements; therefore, the preparedness to work additional hours and deploy on detachments in the UK and overseas, is essential to deliver a successful maintenance business.

Line Manager	Dotted Line	Direct Reports	Dotted Line
Crew Chief	Licensed Aircraft Engineer	N/A	N/A

### Key Responsibilities

Safety first. Operate at Draken in accordance with the SHE Technical standards. Identify where the SHE Technical Standards are applicable to appointed operations/tasks and apply safe systems of work identified.

- The supervision and performance of ground movements of aircraft assigned to them.
- Ensuring that their duties are performed in a safe and proper manner and in accordance with the relevant Maintenance Manuals, and the Maintenance Organisation Exposition. The certification of maintenance performed within the scope of their authorisation.
- To ensure the correct and timely completion of all aircraft documentation relating to the maintenance activities performed under their certification.
- The certification of maintenance performed within the scope of their authorisation.
- Ensure work areas are always kept clean and tidy.
- Evaluate all existing standards, practices, and procedures with a view to continuous improvement and efficiency

- Assist the Crew Chief (where applicable) in the day-to-day functions of the team
- Assisting the Crew Chief in prioritising tasks and scheduling requirements
- Assisting the Crew Chief in the development of the team
- Ensuring company core values are maintained at all times
- Achieve optimal aircraft maintenance performance; maintain excellent customer and stakeholder relations
- Proactive monitoring and maintenance of their authorisations to always ensure recency and compliance

Other tasks as set by the Crew Chief or Chief Engineer that are considered to be within the capabilities of the individual and required as part of the daily running of the engineering department.

## Key Deliverables

- The safe and compliant completion and certification of aircraft maintenance within a timely manner.
- Accurate recording of maintenance activities performed via the business documentation and computer-based recording systems.
- Adherence to regulatory standards and company procedures
- Working safely and assuring the safety of those around you
- Working efficiently to deliver scheduled and unscheduled tasks to meet operational demands

## Core Skills

### Personal Skills/Abilities

- Team oriented with proven communication and influencing skills
- Customer focussed with good personal and communication skills
- Self-Motivated, confident, and assertive
- A demonstrated capability to work within, and adhere to, a defined set of organisational values
- Medically fit to perform daily engineering duties including detachment working
- A willingness to work shift patterns to suit the business needs
- Security cleared to meet current UK and ITAR requirements in support of the business

### Educational Vocational Qualifications –

- Previous experience within an aircraft maintenance department that may include, line, base or workshop environments.
- Unrestricted CAA Part 66 A Licence with relevant company authorisations as applicable.
- Proven track record, over 5 years' experience within an aircraft maintenance environment is essential
- Good knowledge of Regulatory requirements related to aircraft maintenance is essential
- Ability to work and deliver to deadlines
- Good level of Communication, Team Building and Partnership skills in dealing with stakeholders.
- An understanding, or preferably evidence, of working within a continuous improvement project.

**Key Measures**

- The Safety, Quality and Regulatory compliance of Aircraft Maintenance activities
- Mission Punctuality, aircraft on time performance and MEL rectification
- Contractual delivery compliance, customer satisfaction and organisational reputation
- Staff welfare and morale with effective performance management
- Compliance with all Draken Policies and Procedures and company ethics
- Delivery of continuous improvement and change in line with best practice

**Motivations**

- Self-starter who looks for lateral solutions.
- Needs to understand and deliver customer service, whilst representing the company interests.
- Needs to be able to enjoy working within a small team.
- An ability to work safely while meeting expected delivery schedules
- An ambition to extend Licence coverage
- A willingness to work shift patterns / flexible hours.
